DEAR HIRING MANAGER,

I am excited to be applying for the Web Developer Internship Position at Brandt Information Services. Brandt looks like an excellent place to grow and showcase my newly learned skills in software development. As a person who enjoys the outdoors, fishes and hunts, I would love to apply my newly acquired skills to the creation and enhancement of solutions and systems that support these things.

After working in the environmental field for over 7 years, I decided to expand my skillset to include coding and software development. I believe that tech is an incredibly powerful tool. I am incredibly excited to switch careers to one where I can make even more of a difference in the world. My current job at Vibra-Tech as a project manager involves a lot of multitasking. I work remotely, managing at least 6 projects at any given point, in multiple states. Most of these projects last months, even years. With collaborative effort from my team, I am able to successfully manage them from start to finish. As well as managing and coordinating projects, I am often on the technical side of things, analyzing data and generating reports. I am constantly keeping up with current regulations and changing project requirements in order to ensure that my clients are within compliance and my team is happy. I am always eager to learn more and adapt to new challenges.

I have gained an incredible wealth of knowledge at Epicodus. My education there has gotten me from knowing next to nothing about coding to being well versed in HTML, CSS, JavaScript, C#, .Net, APIs, and so much more. I believe my Github page showcases my abilities. I have gained even more collaborative skills by learning to effectively pair program and work remotely on team projects. Since tech is constantly changing, I treat it much like the projects I currently manage, and am always looking to learn new skills, adapt, and figure out new solutions to complex issues.

I believe my skills and passion would be a great asset to the team at Brandt. It would be a privilege to discuss your Web Developer Internship position more in detail. I am available to talk at your convenience. Thank you for your time and consideration.

Sincerely,
Mary Marks

MARY MARKS
JUNIOR WEB DEVELOPER

(512)-289-5162   maryleemarks@gmail.com   LinkedIn   Github

OBJECTIVE

Motivated junior developer transitioning from a career in environmental science. Looking to apply my project management skills to solving technical problems for customers and collaborating with teammates.

PROJECTS

Pierre's Treats – .NET, C#, Entity, Html, MySQL
https://github.com/maryleemarks/PierresTreats.Solution
- A treat and flavor tracker app for a bakery demonstrating many to many relationships

Currency Exchanger – JavaScript, CSS, HTML, exchangerate API
https://github.com/maryleemarks/currencyExchanger
- Webpage that allows you to convert Euros or US dollars to other currencies using the exchangerate API
